

# JENNY CHONG

Jenny is a Non-Executive Director with Medway NHS Foundation Trust. She sits on boards and committees for The Design Museum, Imperial College London's Venture Mentoring Service, the Egypt Exploration Society; Orthopaedic Research UK; NIHR i4i and The Shuri Network. She is deputy director and mentor on Imperial College's Venture Mentoring Scheme and their Engineering Faculty's Imperial Technology Experts Service; and an advisor to various start-ups in the FinTech, MedTech and social impact space.

Originally from Singapore, after graduating from the London School of Economics, Jenny embarked on a 20-year career in Investment Banking. Starting in Equities, she has worked across hardware infrastructure, software engineering, program management, big data and AI. Her most recent role was as Credit Suisse's Global Head of Electronic Communications Surveillance, building a global regulatory compliance platform that detects potential malicious behaviour; leveraging natural language processing and deep learning to cognitively learn human context; identify patterns to create behavioural models; and detect anomalous signals.

Jenny actively promotes education in STEM, gender equality, diversity and inclusion. She is also a recipient of the Tech Star award at the "Women in Banking and Finance Annual Awards for Achievement".
